

September 8, 2015

To whom it may concern:

Shaheen (Sean) Ghazazani worked as a summer intern for Forrest Green for just over 4 months in 2015. During that time, he worked as a web programmer under my supervision. His work included:

- Writing code in PHP using PHPStorm;
- Implementing a Model-View-Controller (MVC) design pattern;
- Styling pages using CSS;
- Using JavaScript and AJAX;
- Writing SQL database queries;
- Using SVN for source control;
- Troubleshooting and repairing defects;
- Taking part in customer meetings for requirements analysis and pre-sales activities.

Shaheen is a quick learner, and was able to make a positive contribution to the projects to which he was assigned. He always had a good rapport with coworkers and customers. I can say with confidence that Shaheen would be an asset to any organization, and wish him the best of success in his career.

Yours truly,

Jared Langdon,  
Ottawa Site Lead
