📍 1 Beamish Crescent, Ottawa, Kanata

Work experience in: Angular.JS, TypeScript, HTML5, SCSS/CSS3, Java, MySQL, PHP, GIT, SVN, and XML

Proficient in: C, C++, Python, and Node.js

Minimal experience in: C#, Ruby on Rails, MongoDB, and Ajax

AVAILABILITY & EDUCATION:

- Seeking full-time employment for the Summer 2016 term.

Bachelor of Computer Science, Carleton University

September 2013 – April 2017 (Expected)

Honors Software Engineering – Co-op

- Third Year Standing, 9.7/12 GPA (B+)
- Number of complete co-op terms: 2
- Reference letters for Kinaxis, and Forrest Green are viewable at <http://www.shaheensweb.me>

WORK EXPERIENCE:

Software Application Developer Co-op, Kinaxis

Sept 2015 – Current

Project: RapidResponse – Adaptive Collaboration

Tools: HTTP, REST web services, CSS3, TypeScript, Angular.JS, React.js, Jasmin Unit Testing, and HTML5

- Developed alongside the Mobile Application team on the active collaboration feature of the RapidResponse tool.
- Performed bug fixes, UI/UX structuring, and developed new tools in collaboration with various internal teams.
- Presented my contributions to the company through bi-weekly sprint meetings with executives, ensuring productivity.
- Actively used *GIT* alongside *SourceTree*, *Stash*, and *Jira* to log bugs, solve bugs, review code, and more.

Software Developer Co-op, Forrest Green

April 2015 – Sept 2015

Projects: Police Solutions, Work Management Solutions (WMS), and the Aboriginal Credit Project (ACP)

Tools: PHP, PhpStorm, MySQL, JavaScript, HTML, and CSS3/CSS

- Lead the development of a web application (WMS) to increase company efficiency.
- Company adoption of WMS lead to more efficient internal communication due to Project, Task, and Notes being integrated into one simple tool. A web portal created with PHP/MySQL stack with proper web standards.
- Used PHP standard MVC design pattern to separate business logic from presentation logic.
- Designed a user interface to facilitate communication between clients, internal teams, and partners.

Junior Systems Administrator, Department of National Defense

May 2014 – Sept 2014

Projects: BlackBerry support documentation, IT ticket management, and Computer hardware support

Tools: In-house ticketing systems, Excel

- Lead the way to the creation of BlackBerry support documentation.
- First point of contact IT support which included creating tickets within an in-house ticket management tool and getting computers/servers online time efficiently.

Web Developer & Designer, Carleton University Students' Association

August 2015 – Sept 2015

Project: A one month restructuring of: <http://www.cusaonline.ca>

Tools: WordPress, PHP, JavaScript, HTML, CSS

- Refactored CUSA website to optimize speed and fix bugs, resulting in a 4x decrease in page load time.
- Redesigned and customized WordPress plugins, and themes. Ultimately adding on top of a larger predesigned WordPress template for the student association at Carleton University.

LEADERSHIP & VOLUNTEERING:

Head Delegate, CUSEC

Sept 2015 – Current

- Organized Carleton University's presence at CUSEC (Canadian University Software Engineering Conference).
